

Save water?
Save energy?
Save time?
And save money?

Sunbather Multi-Pro Rollers have it covered.

Water Restrictions are in place.
From now on, a pool cover is no longer
just an option. It's an essential part
of your water savings plan.

Sunbather pool covers carry the Smart
Approved Watermark. They are probably the
best water saving device you can install in
your home. But to be effective every pool
cover needs a matching quality roller.

Sunbather has pool covers for every size and shape of
pool starting from as little as \$1200. For more information
on Sunbather's vast range just visit the website at
www.sunbather.com.au or ring **1800 268 377** that's...

1800 COVERS

PO Box 107 Hastings Victoria 3915

The Sunbather Multi-Pro Roller. An Intelligent Purchase.

Selecting the right roller is just as important as choosing the right cover for your pool. The wrong roller will make the cover too difficult to handle every day. And a system that's too difficult to use simply won't be used.

The Multi-Pro roller is stylish, sturdy, and the easiest to use on the Australian market. Like all Sunbather products it's unique features are designed for Australian conditions.

END FRAMES:

The strongest in the industry, they come complete with large diameter hand-wheels as standard.

NON-SKID ANCHORS:

These hold the roller in place without having to drill holes in the paving.

LOCKABLE CASTORS:

Simple bolt on option which makes your roller easy to roll away from the pool edge.

GEAR DRIVE UNIT:

This option [pictured above] allows you to mount the roller high on a wall or out of the way below decking. Mounting options are limitless. The extended crank handle makes sure that operating the roller remains a breeze.

EXPANDABLE SHAFTS:

Sunbather roller shafts have a larger diameter than the competition and that simply means that they are stronger, require less turning and can span wider pools. When other rollers are collapsing under the strain the Sunbather rollers remain free and easy to turn.

SLIMLINE WINDER HANDLE:

This clever handle tucks away inside the roller after use. Safe and sensible design from Sunbather.

Not only is the Multi-Pro the most adaptable pool cover roller available, it is also the easiest to assemble. Each component has been designed to lock together without drilling or screwing giving the pool owner a cleaner looking, more professional and stronger finish.
