

Save water?
Save energy?
Save time?
And save money?

Relax, Sunbather Thermal Blankets have it covered.

Water Restrictions are in place.
From now on, a pool cover is no longer just an option.
It's an essential part of your water savings plan.

A Sunbather thermal pool cover carries the Smart Approved WaterMark. It is probably the best water saving device you can install in your home.

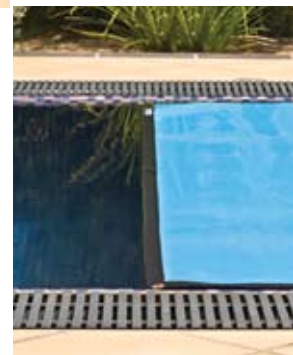

Sunbather has pool covers for every size and shape of pool starting from as little as \$1200. For more information on Sunbather's vast range just visit the website at www.sunbather.com.au or ring **1800 268 377** that's...

Head Office 2174 Frankston-Flinders Road
Hastings Victoria 3915
PO Box 107 Hastings Victoria 3915

Seven more reasons to install a thermal blanket:

1. A heated swimming pool will evaporate almost twice its volume every year!

Take a look at your pool and visualise how much water that is... quite a lot isn't it. On a standard 8m x 4m pool, that's almost 80,000 litres of water every year lost. The average household uses 240,000 litres a year. A thermal blanket will eliminate over 90% of this water loss.

2. If your pool is heated via gas or electricity you can cut your heating bills.

A thermal blanket is up to twice as effective at retaining heat as a solar or bubble blanket, and will save you money.

3. A thermal blanket will last longer than other pool covers.

It won't break down into tiny plastic pieces and clog your filters, causing nothing but damage and headaches.

4. A thermal blanket looks best.

Being a flat multi-layered, foam-based material it holds its shape better than flimsy covers and will lie neat and flat on the pool.

5. Thermal blankets require less maintenance.

Unlike other covers, a thermal blanket is safe to leave uncovered in the sun. You don't need to worry about covering it every time you use the pool.

6. A thermal blanket blocks out sunlight.

Sunlight is what assists algae growth, so blocking it out will reduce your chemical usage and maybe even filtering hours. Saving you even more money.

7. Get a return on your investment:

With all of the above benefits, a thermal Pool Blanket will pay for itself in under 2 years.

Sunbather also has a range of Pool Cover Rollers to suit all Pools. Often a roller is not considered when purchasing a pool cover, but without a strong, easy to use roller, you won't use your cover.
