

Save water?  
Save time?  
Save money?  
And save lives?

Relax, Sunbather has it covered.

Like a sail going up a yacht mast the Sunbather Automatic Security Cover is pulled across the pool at slow walking speed to totally seal the water surface.

Made from a heavy duty, reinforced, water-proof material, its operation is fully automatic. And it rolls up neatly for storage at one end of the pool.

See our website for video demonstrations.

Sunbather has pool covers for every size and shape of pool starting from as little as \$1200. For more information on Sunbather's vast range just visit the website at [www.sunbather.com.au](http://www.sunbather.com.au) or ring **1800 268 377** that's...

# 1800 COVERS

Sunbather Pty Ltd  
ABN 81 004 898 631  
Head Office 2174 Frankston-Flinders Road  
Hastings Victoria 3915  
PO Box 107 Hastings Victoria 3915

The ultimate pool safety cover eliminates evaporation from all pools and overcomes many of the condensation problems associated with heated indoor pools.

#### **BENEFITS:**

Heating, water treatment and general maintenance costs are greatly reduced. Simple operation makes it ideal for pools servicing small communities as well as residential and special purpose pools.

#### **RAINWATER AND LEAF REMOVAL SYSTEM:**

Leaves and rainwater are sieved and collected as the cover automatically retracts saving hours of work for outdoor pool owners.

#### **SECURITY:**

The cover is not designed for foot traffic, but will easily support the weight of an adult, child or animal should they stray onto the cover. Unless the pool owner has obtained special exemption from the local authority the vinyl cover does not replace the need for a pool fence.

#### **OPERATION:**

The cover runs in parallel tracks down each side of the pool. It sits on the water surface and is driven by a hydraulic motor/gearbox mechanism linked to the storage shaft. Controls are activated by a removable key in a switchplate. Tracks can be hidden under the coping or recessed into the pool wall.

#### **MODELS:**

There are many model combinations, each designed for a specific application. The most popular are:

**Hydramatic Below Ground:** Designed to be fully integrated into a new concrete pool construction, it retracts fully and completely disappears below pool coping level. **Hydramatic Above Ground:** Suitable for fitting most shaped pools, it is stored above ground at one end of the pool in a specially constructed bench. **EZ Cover:** Is a manually operated version and is suitable for most pools. All models can be used on new pools.

**Colour Options:** Available in eleven colours to suit most landscapes.

**Storage Bench Options:** Above ground cover storage bench is available in white, grey, tan and terracotta.

**Pool Shape & Size:** Geometric shapes are preferred, however freeform pools with steps and swimouts can be covered successfully. Pools up to 25m long including lap pools can be fitted. Please contact us for advice on individual pools.

**Technical Support:** Engineering drawings designed to assist pool builders in the initial design and construction of the pool are made available at the beginning of each installation. We can supply many options including storage lid grating, extra keyswitch modules etc. Sunbather technical staff are always available to assist during all stages of the project.

**Pricing:** Indicative pricing and technical information for a particular project should be obtained from Sunbather Head Office.
