

Save water?
Save time?
Save money
And save lives?

Relax, in winter Sunbather has it covered.

Water Restrictions are in place.
From now on, a pool cover is no longer
just an option. It's an essential part
of your water savings plan.

A Sunbather Winter Cover carries
the Smart Approved Watermark.
It is probably the best water saving
device you can install in your home.

Sunbather has pool covers for every size and shape of
pool starting from as little as \$1200. For more information
on Sunbather's vast range just visit the website at
www.sunbather.com.au or ring **1800 268 377** that's...

1800 COVERS

Authorised Dealer:

Sunbather Pty Ltd
ABN 81 004 898 631
Head Office 2174 Frankston-Flinders Road
Hastings Victoria 3915
PO Box 107 Hastings Victoria 3915

Slash pool running costs over winter.
Save on chemicals, filtration and
countless hours of your valuable time.

WINTERISE YOUR POOL NOW:

In Melbourne, pools are generally not used for 6-7 months of the year so why waste hours maintaining it when you can't use it? Install a Sunbather Winter Cover, forget about your pool for the winter, and have it nice and clean ready for summer.

KEEP OUT EVERYTHING EXCEPT RAINWATER – EVEN THE DUCKS!

The winter cover is such a tight fit on your pool it keeps all leaves, debris, dirt, pets and small kids out, yet rainwater will pass straight through.

LIKE A TRAMPOLINE OVER YOUR POOL.

This lightweight super strong material pulls taught across your pool creating a trampoline like effect over your pool. Each Sunbather Winter Cover is custom made to the shape of your pool so it looks great, can be installed in under half an hour, and stored in the special bag provided.

STRONG AND EASY TO USE ATTACHMENT METHOD.

Simple methods of attachment are used to ensure the cover is quick and easy to use. When the cover is removed, there is nothing protruding above the paving to stub your toe on.

A HEATED POOL WILL EVAPORATE ALMOST TWICE IT'S VOLUME EVERY YEAR!

Take a look at your pool and visualise how much water that is... quite a lot isn't it. On a standard 8m x 4m pool that's almost 80,000 litres of water every year lost. The average household uses 240,000 litres a year.

Fortunately Sunbather's Winter Covers are approved by the National "Smart Approved Watermark" meaning it will drastically reduce evaporation.

BLOCK OUT THE SUNLIGHT AND PREVENT THE GROWTH OF ALGAE.

Sunlight is what makes algae grow, so blocking it out will reduce your chemical usage and maybe even filtering hours. Saving you even more money.

GET A RETURN ON YOUR INVESTMENT.

With all of the above benefits, a Winter Cover will pay for itself in well under 2 years giving you more time to do what you want over winter.
